## Marlow Hunter Vision 360 Electric

**"Go Green" with this spacious, innovative family cruiser**

Marlow Hunter has teamed up with Elco Electric Motors to deliver a beautiful, spacious boat which incorporates an AC induction motor powered by a rechargeable battery bank. It has only one moving part virtually eliminating engine maintenance. There are no oil changes, no belts to check and no coolant levels to monitor. No fuel tank. It runs cooler, is quiet, has less vibration and eliminates the cost, smell and emissions associated with a traditional diesel engine.

By blending "green" technology with a roomy interior, and a hull shape designed for maximum speed and stability, Marlow Hunter once again demonstrates their innovative approach to building boats geared towards improving the overall experience for today's sailors.

- Battery recharging option include – Shore Power, Solar Panels, Generator or Wind Turbine
- Hull design geared towards performance
- Wide side decks for easy maneuverability around the deck
- Wrap around cabin top windows for a roomy, open feel in the salon
- Well-appointed galley set up to satisfy any gourmet cook
- Drop down helm seat doubles as a swim platform and makes boarding easier.

### Specification

### *The Hunter Advantage*

With an emphasis on building a boat that's beautiful and comfortable Marlow-Hunter is not only the largest, but also the most popular cruising sailboat manufacturer in North America. Providing value for the money is one of the cornerstones of their mission.

Plus, following their tradition for innovation, Hunter continues to stay on the cutting edge by incorporating options that provide an ownership experience which emphasizes safety and an ease-of-sailing: all to provide more fun on the water.

*"SailTime® is the single best idea to increase boating participation in years."*

John T. Peterson  
President of Marlow-Hunter, LLC
